

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

NEW YORK  
ANNUAL REPORT  
OF THE

SECRETARY OF STATE.

SECRETARY OF STATE'S OFFICE.

COLUMBUS, OHIO, DEC. 29, 1855.

TO HIS EXCELLENCY, WILLIAM MEDILL :

SIR :—In obedience to the Constitution, I have the honor to present the report of this office, as required to be made “ preceding each regular session of the general assembly.”

The law to provide for the organization of cities and incorporated villages, requires the Secretary of State to receive and preserve in his office all papers transmitted to him in relation to the organization of incorporated villages, or the annexation of territory to any city or incorporated village, etc., and submit to the general assembly at each regular session thereof, a report showing the names, location and limits of each incorporated village organized under said act, and the cities and incorporated villages, the limits of which have been increased, previous to the time of making up of said reports, and the limits so added :—in pursuance of which, transcripts are herewith communicated, (see appendix marked B,) the original of which, together with the plats, are on file in this office.

I would respectfully call the attention of the general assembly to the fact that the law only provides that these papers be *filed* in this office ; no provision having been made for recording them.

If this somewhat loose method of preserving valuable papers should not endanger their safety, it is evident that their accumulation will in the progress of time render it troublesome, if not difficult in the accumulated rubbish of years, to find particular papers as they may be required.

I would, therefore, suggest, that provision be made by law, for permanently recording, not only such of these papers as are now on file, but all those which may be hereafter transmitted to this office ; and indeed it would be an additional guarantee of their security against loss or casualty to the public archives, if provision were made by law, for recording all papers of value that are now only required to be filed.

## JAIL REPORTS.

Sheriffs are required by the "act for the regulation of county jails," to make out a jail report, and transmit one copy to the Secretary of State, whose duty it is to communicate the same to the general assembly.

In my last annual report, I called the attention of the general assembly to the fact that but *seven* of the sheriffs of the State had for each of the years of 1852 and 1853 respectively, complied with the above provision of the law.

I then suggested the propriety of either providing some more efficient means of enforcing the law, or of repealing it altogether. Subsequently I addressed a copy of that report to each sheriff in the State, and marked the passage, calling their attention to this particular duty, but have only received sixteen reports for the year 1854, and but twenty-one for 1855, all of which are herewith communicated (see appendix C.)

## STATISTICS.

The Constitution contemplates the establishment, at some future time, of a "Bureau of Statistics," connected with the office of the Secretary of State.

Although it is but recently that Statistics has taken its proper rank as a science, it has already accomplished much for the improvement of society, and the amelioration of the condition of man. It has been established as a distinct Bureau, or received the fostering care of the governments of France, England, Prussia, Austria, Sweden, Bavaria, Wurtemberg, Naples, Sardinia, and others; and some of the states of this Union, with but a moiety of the resources of Ohio, have made provision for its establishment and maintenance upon a scale commensurate to its vast importance.

But few states or countries of the world have made such giant strides to wealth and greatness as our own. As proof of which we need but point to the official reports of our public officers at successive periods of time. Illustrative of this, in the report of the Auditor of State for 1835, now just twenty years, a paragraph congratulatory to the people of the State occurs, couched in language of burning enthusiasm, and set in type of glaring capitals; as follows: "By the returns of the past year, the total value of the taxable property of the State \* \* \* amounts to the sum of NINETY-FOUR MILLIONS, FOUR HUNDRED AND THIRTY-SEVEN THOUSAND, NINE HUNDRED AND FIFTY-ONE DOLLARS!"

By reference to the last year's Report of the Auditor of State, just nineteen years from date above, we find the value of the taxable property for 1854, to have been but little less than *eight hundred and sixty-seven millions of dollars*, (\$866,929,982.) A nine-fold increase in nineteen years! To have foretold this magic increase, would have incurred the suspicion that he who made the prediction was a visionary enthusiast.

Many now believe that the measure of our greatness is well nigh full, and that hereafter, our progress will be slow. Such, I humbly conceive, will not be the case, but that our march of progress will still be onward.

To avert this apprehended decline in the ratio of our prosperity, now that the tide of emigration is supposed to be setting against us, we should, by the application of the simplest rules of business life, publish at once, to our own people and to the world, the resources of our State, and the inducements to the employment of capital and labor in their development: and in the establishment of a "Bureau of Statistics," we find the amplest means for the accomplishment of our purpose.

Agriculture is by many regarded as most entitled to prominence in connection with this subject; but if a Bureau of Statistics be established, its purpose should be to ascertain and collect all facts, so far as practicable, that "may be adapted to illustrate the condition and prospects of society" throughout the State.

Among which, as entitled to consideration, are

**1st. VITAL STATISTICS—**

Pertaining to the Physical condition of Man—Registration of Births, Marriages and Deaths—the Sanitary state—all facts necessary to determine the prospective continuance of human life, health, &c.

**2d. MORAL AND INTELLECTUAL—**

Education, Religion, Science, &c.

**3d. PUBLIC IMPROVEMENTS—**

Railroads and other works—completed—in progress—projected—capital invested therein—their business, &c., &c.

**4th. AGRICULTURE—**

The products peculiar to localities—Quality—Quantity—Relative Values at different periods and places, &c.

**5th. COMMERCE—**

Exports—Imports, &c.

**6th. MANUFACTURING, MINING, &c—**

Companies organized—under general law—for what purpose—capital employed—Employees—Profits, &c., &c.

The first Legislature under the new Constitution, manifested a disposition friendly to this design. The apprehension of increasing the expense of this Department, alone prevented that body from adopting measures for carrying out the objects contemplated by the Constitution.

The Hon. John L. Vattier, of the Senate, introduced a bill for this purpose, and supported it by an able and elaborate speech, in which he enumerated many of the advantages that might be expected to result from such a Department.

In view of the above, and entertaining the belief that much valuable information could be collected and disseminated for a trifling expense, I resolved to take—the incipient steps to a small beginning, without incurring any additional outlay to this Department.

The unprecedented drouth of 1854 was suggestive of facts important to the enterprise, and I entered upon the task of collecting and recording the peculiarities of that extraordinary season, as connected with agriculture and some other objects of interest; and although upon a small scale, it was with the hope that the result might lead to the adoption of a statistical system commensurate with the importance of the subject, and the wants of the people.

I accordingly prepared Circulars, one relating mainly to the drouth and its effects upon agriculture, &c., and another upon the subject of internal improvements by Railroads, &c., and the liabilities incurred therefor by counties, cities, townships, &c.; information to which the State government has never had access through any official channel.

The following is a copy of the Circular relating to the drouth and its effects upon agriculture, viz:

1. What are the Chief Agricultural products of your county?
2. To what extent has your county, and those in your immediate vicinity, been effected by the drouth during the past summer and the present autumn?
3. What was the period of its commencement, and what has been its progress?

4. What have been the effects of the drouth upon the different kinds of crops—wheat, corn, hay; also, fruit, &c.

5. What crops are regarded as having yielded an average, as compared with other years?

6. Was the drouth equal in all parts of your county?

7. What have been the prevailing winds during the summer?

8. What was the range of the thermometer, and what have you remarked in regard to dews?

9. What has been the state of the health, as compared with other years? Has any epidemic prevailed? If so, what?

Copies of this Circular were addressed to several gentlemen in each county, and answers thereto returned from all but one: these remain on file in this office, subject to the inspection of the curious: and a summary of them is herewith submitted in tabular form, (see appendix D,) by reference to which it will be observed that all the counties in the State, with the exception of fourteen, suffered severely by the drouth. Two only escaped entirely, while twelve were but partially affected. The North-western counties escaped with the least injury; the drouth in these having been postponed to a later period than in any other portion of the State. In regard to the crops, it will be observed that—

**WHEAT**—Was cut off chiefly by the weevil; only twenty counties report an average crop; nearly an average in five counties, while in thirty-nine counties it is reported as nearly destroyed.

**CORN**—An average crop in twelve counties, chiefly the North-western; better than ever before in Wood county; nearly a failure in eight counties, and from one-fourth to three-fourths of a crop in the rest of the State.

**POTATOES**—Average crop in four counties, viz: Lucas, Wood, Henry and Paulding. Total failure in fifteen counties; nearly a failure in twenty-one counties, and seriously injured in all the rest.

**HAY AND OATS**—These were abundant, as was the case with all crops maturing before the 1st of July: the depredations of the weevil of course excepted; and the ravages of this insect were least in proportion as the wheat matured early.

It will also be observed that they present a remarkably favorable bill of

**HEALTH**—In sixty-nine counties, good; of which twenty-one are represented as unusually free from disease; sixteen are represented as very sickly, while three make no report on the subject.

**CHOLERA**—In twenty-four counties; in nine of which it is represented as very fatal, viz: Defiance, Delaware, Hancock, Huron, Licking, Lucas, Marion, Seneca and Wood.

**DYSENTERY**—Epidemic in seven counties; prevalent, but not epidemic, in eight counties.

**FEVER**—*Typhoid*—In four counties.

“ *Scarlet*—In one county.

“ *Intermittent, Remittent, &c.*—In but eight counties!

I regret that the information in regard to the public health was not always obtained from members of the medical profession; but it is presumed to be sufficiently accurate for all practical purposes. Medical gentlemen will be impressed with the important fact of the unusual exemption of the State from malarial disease, during that most extraordinary year, even in those localities of its almost universal prevalence.

The facts accumulated by the above plan, drawn from sources entirely reliable,

may be made to furnish a fund of information which can be quickly brought together, so as to be of immense value, not only to the people of the State, but to other portions of the Union. By it a knowledge of the resources of the State may be obtained, sufficiently accurate for all practical purposes, so that the agriculturist may know the probable demand for his surplus products, whether abundant or scarce, while the consumer, or the manufacturer and the foreign customer may know what relation the supply bears to the demand: will acquaint those portions of the State that may be deficient in particular crops where to find a supply, and enable the political economist to estimate with great accuracy the financial capabilities of the State, and the probability of an abundance or scarcity of money, which is in reality but the representative of the productive wealth of a State.

By a comparison of the returns made to this office for 1854, with those last made through the Assessors, and estimating the probable prices that a full crop would have commanded, based upon well known laws of trade, we shall find that the people of this State lost, by the deficiency of the crops from the drouth and the weevil during that extraordinary year, more than fifty millions of dollars, as compared with an average crop; a sum sufficiently large to test the capacity of a young State; and it is a matter of gratulation that during this period, while the credit of many of the States was seriously depressed, our own has risen, and been maintained at a higher point than it had ever before attained, and scarcely excelled by the oldest or wealthiest State in the Union; which position it is our pride still to occupy.

As intimately connected with the productive resources of the State, or perhaps more properly, another branch of productive wealth, the Rail Road interests presented a subject no less important for the collection of statistics; and I accordingly prepared circulars embracing the following questions, viz:

1st. What Rail Roads in, or passing through, your county are finished, or in a running condition, and for what distance are they so completed?

2d. What Rail Roads are under contract? How far advanced? And with what probable prospect of completion?

3d. What Rail Roads are organized under SPECIAL LAWS, what under the GENERAL LAW, providing for the organization, &c., of Rail Roads, &c., passed May 1, 1852?

4th. What Rail Roads, Turnpike Roads, Canals, or other internal improvements of the above class are aided by subscriptions on the part of your county, townships or villages? And to what amount is each thus aided respectively?

5th. Please name the townships, villages, &c., and the amount subscribed respectively.

6th. Name any other liability incurred for county, city, or other public expenditure.

This Circular was addressed to several gentlemen in every county, until I succeeded in obtaining a reliable answer from each, respectively, in the State. A condensed summary of the whole, accompanied with a map, which I have prepared with great care, is herewith communicated. (See appendix A.) And I flatter myself that this summary, which I have endeavored to arrange methodically, will not only prove interesting to the political economist and gratifying to the public creditor, but be found useful and convenient to the legislator, especially that information which relates to the pecuniary liabilities of the several counties and cities of the State; a compilation which, so far as I am advised, has never before been undertaken.

For the present year, I have issued no Statistical Circular. I have, however, received from reliable sources such information in regard to the agricultural pro-

ductions of the State, as to be able to make a pretty correct estimate of the staple crops of this year, which has been as prolific of rain as last year was extraordinary for drouth.

With the exception of a few counties where excessive wet weather injured the crops, embracing those chiefly which produced the most abundantly in the year 1854, returns to the agriculturist have far exceeded the average of past years. The wheat crop of Ohio for 1855, will not probably be less than thirty millions of bushels, and that of Indian corn will exceed the enormous quantity of eighty millions, while other crops are correspondingly large.

These immense crops, commanding as they now do, prices far above those of any preceding year, can hardly fail to produce results as favorable to the financial prosperity of the State, as those of the drouth of 1854 were depressing to her interests.

I trust that the importance of the subject will be regarded as a sufficient apology for the space here occupied in presenting this synopsis of statistical information; for our noble State, with all her prosperity,—her productive soil, her capacity for furnishing food and apparel for millions beyond her own borders, without some well digested system of arriving at a knowledge of her resources, her strength can never be known, nor her greatness fully appreciated.

The great and growing interest taken by all classes of our people in our agricultural societies, both county and State, is evidence of a correct appreciation of their usefulness; and although annual Fairs, under the guidance and control of the highest intelligence of the State, have accomplished much, they cannot fulfil all the purposes and afford all the information that is important to the full development of our resources.

Co-operating with these associations, a "Bureau of Statistics," with an agricultural department, would contribute greatly to advance the interest of the State. For the immense resources of her virgin soil, all extremely productive, her widespread beds of mineral wealth as yet but slightly developed, with other advantages not excelled, if equalled, by the newest territories far removed from the comforts and conveniences with which time and industry have surrounded us; occupying a central position in the Union, with a market at her very door, with twenty-six hundred miles of railroad already finished, and nearly as many more in progress of construction, and eight hundred miles of navigable canal, and all these public improvements constructed within a few years, with her State debt reduced to less than fourteen millions, her bonds commanding a large and increasing premium, and greedily sought for by capitalists, both at home and abroad, with three-quarters of a million in her State Treasury, while the entire liabilities of all the counties, cities and townships of the State, amount to less than nine millions, the most of which is invested in productive public improvements;—with all these advantages, the tide of emigration, instead of setting westward, should flow back to fill our own unoccupied lands, build up our cities and towns, and unbosom the untold millions of mineral wealth that underlies our soil.

By the means above suggested, with but little labor and trifling expense, more substantial inducements could be presented to the enterprising emigrant and the sagacious capitalist, than can be furnished through all the gilded attractions of any new State or Territory now organized, or likely soon to be formed.

I have the honor to be, most respectfully,

Your obedient servant,

WILLIAM TREVITT,  
*Secretary of State.*

## APPENDIX B.

There has been no sickness prevailing in the jail during the past year. There has not been any labor performed by the prisoners, owing to the inconvenient construction of the jail. I have, during the year, caused the prison to be frequently scrubbed and cleaned. I also caused the same to be whitewashed early in the spring, in the middle of the summer, and during the month of October. The habits of the prisoners, as to personal cleanliness, diet, and order has been generally good. As to rules for the prison, I have not been furnished with any. I made it a practice to furnish each of the prisoners with a copy of the Bible, and have generally provided the jail with the two newspapers printed in our county. As to religious instruction other than the foregoing, I have on several occasions invited ministers of the Gospel to visit the prison, and was answered by one of them that prisoners in jail were too far gone in crime for him to visit, and that they must reform to a certain extent before he would agree to give them religious counsel. This answer may have been given for the reason no pay was offered for his services.

Respectfully submitted,

JOHN D. JONES,  
Sheriff of Ashland County.

November 1, 1854.

The foregoing is a correct report of the persons committed and discharged during the current year. The rooms of the jail were white-washed in April, July and October, and the several rooms occupied by the prisoners were regularly washed and kept clean. The prisoners have been furnished with useful reading matter, as far as circumstances would permit.

The foregoing is a correct report of the prisoners committed and discharged during the current year. There has been some sickness among the prisoners, but none of a violent character. The prisoners have been attended by a physician when their situation required treatment. There has been no labor performed by the prisoners; the rooms of the jail were white-washed twice a year—spring and fall; the rules furnished for the government of the jail have been regularly furnished to the prisoners; they have also had Bibles, Testaments and other useful reading matter.

Sheriff of Delaware County.

#### JAIL REPORT OF FAIRFIELD COUNTY.

Sir—I have the honor herewith to transmit the annual jail report for Fairfield county, as required by law. Whole number of prisoners received from the first day of November, 1854, to the first day of November, 1855, sixty-two. Whole number discharged sixty. Now in jail two insane persons. A large proportion of the above were committed for drunkenness or the violation of city ordinances.

Very respectfully yours,

Wm. TAYLOR, Secretary of State, Columbus.

LANCASTER, OHIO, November 1, 1855.

WILLIAM POTTER,  
Sheriff of Fairfield County.

The foregoing is a copy from the jail register of Geauga county. The undersigned entered upon the duties of his office on the 17th day of November, 1852, and found one prisoner, to wit: George D. Haskins, in the jail; and found the jail in a very unsafe condition, the cells for the confinement of prisoners being in the basement of the building; and the inner walls, constructed of wood material, had become entirely rotten. I have since constructed cells in an upper room of the building, formerly occupied as a debtors' room, which is now very comfortable, though not as safe for holding prisoners as it should be, and have abandoned the lower cells entirely, as they have often been indicted by the grand jury. I have never been furnished with any jail register kept prior to my coming into office, and know not where to find it if any was kept. Neither are there any jail rules provided for me as required by law. The jail has, however, been kept clean, and frequently whitewashed, and all duties attended to necessary for the comfort and welfare of prisoners. There has been no sickness among the prisoners, nor any labor performed by any of them. Their habits for cleanliness have been good; and each prisoner has been furnished with a copy of the Bible and other moral books, and newspapers of the day.

There has been several of the prisoners sick during their confinement in jail during the year ending Nov. 1st, 1855 : Wm. Haas, disease of the lungs; Thomas Carroll had bilious cholera, Thomas Browder chill and fever. Several other prisoners were sick, owing to the dampness of the prison, caused by the leaking of the roof of the jail during the wet season. No labor has been performed by the prisoners during the last year. The jail or prison rooms have been whitewashed three times during the year, in April, July and Sept., and each cell that was occupied, well scrubbed and washed out at least every two weeks. The prisoners were of various habits as to personal cleanliness. They were always furnished with good substantial food, such as is used by the citizens generally, (unless those that were otherwise sentenced.) As regards the operations of the rules and directions, prescribed by the President Judge, they have been enforced as much as practicable. Each prisoner was furnished with a Bible and often newspapers during their confinement.

DANIEL LEWIS, Sheriff of Greene county, Ohio.

There has been no sickness prevalent in the jail of any account, nor any labor performed, of any kind, by the prisoners during the year, except sweeping out the cells. I caused the jail to be thoroughly whitewashed in April, July and October, and caused the cells to be scrubbed and cleansed every few days during the confinement of prisoners. The habits of the prisoners as to personal cleanliness, diet and order, have been good, with a few exceptions. There has never been furnished me any rules prescribed by the president judge, as is required by law. The prisoners have always been furnished with a copy of the Bible.

Given under my hand, this first day of November, 1854.

JOSEPH H. MULLENIX, Sheriff.

The foregoing is a correct report of persons committed and discharged from the jail of said county of Jefferson, Ohio, during the current year. There has been but very little sickness among the prisoners, and none of a virulent character. The prisoners have been regularly attended by a physician when their case required; and there has been no labor performed by the prisoners. The rooms of the jail were whitewashed frequently, and also in April, July, and October, and the several rooms occupied by the prisoners were washed once a week regularly. The rules prescribed by the Judge of the Court of Common Pleas for the government of the jail do well. The prisoners have been furnished with Bibles and Testaments and other useful reading matter during their confinement.

SHERIFF'S OFFICE, STEUBENVILLE, November 1, 1854.

There has been some sickness, but nothing very serious during the year. The jail has been thoroughly white-washed three times, and ventilated, during the present year. There has been no labor performed by the prisoners during the year, except sweeping the jail, &c. The habits of the prisoners for cleanliness and order, have been very good. The rules established by Judge Humphreyville for the regulation and government of the jail, have a tendency to promote good order, and to increase the comfort and convenience of the prisoners. A copy of the Bible has been in the possession of each prisoner.

I hereby certify the foregoing to be a correct abstract from the Jail Register for Lorain county, for the year ending November 1st, 1855. Given under my hand, at Elyria, this 1st day of November, A.D. 1855.

ASHBEL CULIVER, Sheriff of Lorain county Ohio.

There has been no sickness prevalent in the jail of any kind, nor any labor performed, of any kind, by the prisoners during the year, except sweeping out the cells. I caused the jail to be thoroughly whitewashed in April, July and October, and caused the cells to be scrubbed and cleansed every few days during the confinement of prisoners. The habits of the prisoners as to personal cleanliness, diet and order, have been good, with a few exceptions. There has never been furnished me any rules prescribed by the president judge, as is required by law. The prisoners have always been furnished with a copy of the Bible.

Given under my hand, this first day of November, 1854.

JOSEPH H. MULLENIX, Sheriff.

The foregoing is a correct report of persons committed and discharged from the jail of said county of Jefferson, Ohio, during the current year. There has been but very little sickness among the prisoners, and none of a virulent character. The prisoners have been regularly attended by a physician when their case required; and there has been no labor performed by the prisoners. The rooms of the jail were whitewashed frequently, and also in April, July, and October, and the several rooms occupied by the prisoners were washed once a week regularly. The rules prescribed by the Judge of the Court of Common Pleas for the government of the prisoners have been furnished with Bibles and Testaments and other useful reading matter during their confinement.

SHERIFF'S OFFICE, STEUBENVILLE, November 1, 1854.

There has been some sickness, but nothing very serious during the year. The jail has been thoroughly white-washed three times, and ventilated, during the present year. There has been no labor performed by the prisoners during the year, except sweeping the jail, &c. The habits of the prisoners for cleanliness and order, have been very good. The rules established by Judge Humphreysville for the regulation and government of the jail, have a tendency to promote good order, and to increase the comfort and convenience of the prisoners. A copy of the Bible has been in the possession of each prisoner.

I hereby certify the foregoing to be a correct abstract from the Jail Register for Lorain county, for the year ending November 1st, 1855. Given under my hand, at Elyria, this 1st day of November, A.D. 1855.

ASHBEL CULIVER, Sheriff of Lorain county Ohio.

1st. There has been some sickness in the jail, but nothing very serious, during the present year. 2d. The jail has been thoroughly whitewashed and ventilated three times during the present year. 3d. There has been no labor performed by the prisoners during the year except sweeping the jail and pumping the water for the use of the building. 4th. The habits of the prisoners for cleanliness and order have been very good. 5th. The rules heretofore established for the regulation and government of the jail have a tendency to promote the good order and to increase the comfort and convenience of the prisoners in their confinement; and lastly, a copy of the Bible has been in the possession of each prisoner, and other readings and moral instruction have not been neglected.

I do hereby certify the above to be a true copy of the jail register of Miami county, Ohio.  
 TROOR, November 4, 1855.

SIMON E. HUSTLER, Sheriff of Miami County.

There has been no sickness of any account during the year. No labor has been performed. The jail was whitewashed with a solution of quicklime in the months of April, July, and October, and the floors washed as often as health and comfort required. The conduct of the prisoners has been generally good. The operation of the rules was salutary. The moral instruction consisted in reading the Bible, and occasional visits from ministers and religious persons. The foregoing is a correct report taken from the jail register of Muskingum county for the year ending November 1, 1854.

B. F. LESLIE, Sheriff of Muskingum county.

The above is a correct report of the names of each prisoner, with the date and cause of his or her commitment; also, the manner of his or her discharge. There has been some sickness, but no prevailing epidemic. They were always attended by a physician, when required. There was no labor performed by the prisoners, other than sweeping the jail. The rooms were whitewashed but twice during the year, on account of repairs that were being made, and that in the months of April and October. The habits of the prisoners, as to personal cleanliness, diet and order were not good. The operation of the rules prescribed by the Court are not well suited to the jail in its present condition. The means furnished prisoners of literary, moral and religious instructions, were the Bible and city newspapers.

JOSEPH RICHEY, Sheriff of Muskingum County, Ohio.

| Jesse Flore.....    | October 1, ..    | Unlawfully selling intoxicating liquor.....  | October 10, ..   | Expiration of sentence.     |

No sickness has prevailed in the jail during the current year. The jail has been whitewashed and cleansed twice during the last year; in the months of April and August. The habits of the prisoners as to personal cleanliness have been strictly attended to. They have been required to wash their persons twice per day, and shave twice per week. The prisoners above named have been mostly very orderly and quiet. They have been supplied with three meals per day, coarse, wholesome diet, with the exception of the above named R. Aylsworth, who was by order of Court fed on bread and water. The rules and regulations prescribed by the President Judge have been beneficial and salutary in their operation. The prisoners have been furnished with Bibles for their moral instruction, and no stated kind of labor has been required of them.

All of which is respectfully submitted.

November 1, 1855.

H. V. DAVIDSON, Jailor of Ottawa County.

# REPORT FROM THE JAIL REGISTER OF PAULDING COUNTY, OHIO, for the year ending November 1, 1854.

The foregoing is a correct report of the persons committed and discharged during the current year. There has been some sickness among the prisoners, but none of a violent character. They have been regularly attended by a physician, when required. There has been no labor performed by the prisoners. The jail was not finished to receive prisoners until May last. The rooms were white washed in October. The habits of the prisoners as to cleanliness, diet and order, have been good. There has never been furnished me any rules prescribed by the Presiding Judge, as required by law. The prisoners have each been furnished with a copy of the Bible and Testament, the county newspaper, and other useful reading matter.

JOHN GROSSON, Sheriff.

There has been no prevailing disease among the prisoners, nor any labor performed by them during the last two years. At different times during that period there has been individual cases of sickness, and the attendance of a physician necessary, which was procured at the expense of the county. The jail has been thoroughly whitewashed three times each year, in the months of March, June or July, and November, and otherwise cleaned as occasion required. The habits of the prisoners have been good as to personal cleanliness, diet and order. Each prisoner has been furnished with a copy of the Bible, and such newspapers and useful books as could be readily procured. The rules prescribed by the Judge of the Court of Common Pleas for the government of the jail, operate well.

NOVEMBER 1, 1854.

There has been no prevailing disease among the prisoners, nor any labor performed by them during the past year. The jail has been whitewashed thoroughly, three times during the past year, in the months of November, March and June, and otherwise cleaned, as occasion required. The habits of the prisoners have been good as to personal cleanliness, diet and order. Each prisoner has been supplied with a copy of the Bible, and such newspapers and useful books as could be readily procured. The rules prescribed by Judge Humphreys, of the Court of Common Pleas, for the government of the jail, operate well.

DUDLEY SEWARD, Sheriff.

There has been but little sickness in jail during the present year; nothing dangerous. The jail has been white-washed three times, and ventilated during the year. Orenus Duffey worked in harvest to pay his fine; no other labor performed by prisoners, except sweeping the jail, etc. The habits of the prisoners for cleanliness and order have been very good. Instructive books have been furnished the prisoners for reading. The cause of nearly all the commitments was intoxicating liquor.

WARRER, December 22, 1855.

There was some sickness during the year. The conduct of the prisoners, while in jail, was, with few exceptions, good. The operation of the rules has been good. The means of moral instruction—the Bible and other books.

I hereby certify the foregoing to be a correct abstract from the Jail Register of Warren county, Ohio, for the year commencing Nov. 1, 1853, and ending Nov. 1, 1854. Given under my hand at Lebanon, this 1st day of Nov. A. D. 1854.

CHARLES A. SMITH, Sheriff of Warren county, Ohio.

The foregoing is a correct report of the persons committed and discharged during the time mentioned above; during which time there has been but two cases of sickness—none of a violent character. The prisoners have been regularly attended by a physician when their case required it. There was no labor performed by the prisoners. The jail rules complied with. The prisoners have been furnished with the Bible and Testament and useful reading matter.

1st. There has been no sickness of any account, nor labor performed, of any kind, in said jail. 2d. I also caused the said jail to be thoroughly whitewashed three times during the past year; once during the month of March, once during the month of June, and once during the month of October; and I also further caused the same to be thoroughly washed, scrubbed, and otherwise cleansed, every few days, during the confinement of prisoners. 3d. The habits of the prisoners as to personal cleanliness, diet and order, has been good. 4th. There has never been furnished me any rules as prescribed by the President Judge, as is required by law. 5th. The prisoners have always been, each of them, furnished with a copy of the Bible.

Given under my hand, this 30th day of October, 1855.

THOMAS SHORTHILL, Sheriff of Williams county.

NOTE.—In the foregoing table, answers to question first are omitted, for the purpose of economizing space. Answers to the second and sixth questions, for the same reason, are embraced in one column, under the head of "Extent of Drouth." In the column headed "Range of Thermometer," the figures and remarks are understood to apply to the periods embraced by the drouth, in the several counties. For more specific information as to Temperature, etc., in Jefferson and Scioto counties, tables are appended, containing extracts from the reports from those counties.

ANNUAL REPORT  
OF THE  
SECRETARY OF STATE.

OFFICE OF SECRETARY OF STATE,  
COLUMBUS, OHIO, Dec. 20, 1856.

To the HON. SALMON P. CHASE, *Governor of Ohio* :

I herewith have the honor of transmitting the Annual Report of this Department, with the accompanying documents, for the year 1856. The law is not explicit upon the subject of an annual report from this office ; yet, as there is something of the kind implied in the act of last winter, and as much of the information contained in the accompanying papers is of present public interest, I have judged it prudent to err upon the side of safety.

**TIMES OF HOLDING COURTS.**—The regular times of holding the District Courts and the Courts of Common Pleas, in all the districts and counties of the State, compiled from the returns of Common Pleas Judges made to this office, and statutes in force fixing the times of holding courts, will be found in appendix (A.) It will be observed that in five districts, (the 5th, 6th, 7th, 8th and 9th,) alterations have been made, either in whole or in part, agreeable to the law of last winter.

**DEAF, DUMB, BLIND, INSANE, &c.**—The returns to this office respecting the deaf, dumb, blind, insane and idiotic, as reported by the assessors, and returned by the county auditors, agreeable to the law of last winter, will be found, in carefully prepared tables, by counties, in appendix (B.) Eighty-two counties have made returns in conformity with the law.

Athens, Belmont, Butler, Hancock and Henry counties have made no report, whatever, to this department. Gallia county reports that the auditor's blanks came too late for distribution among the assessors. I might here observe, that there is nothing positive in the law governing the matter, which requires that these tables should be published in the report of this department. I have thought, however, that it was evidently inferential. Indeed, it would be folly to gather such valuable information, at so much pains and expense, without its being presented for use in a tangible and practical form.

**INCORPORATED COMPANIES.**—So numerous are the inquiries at this department, in reference to the "Incorporated Companies," which are required to file the certificate of their association in this office, that I have deemed it a sufficient reason for publishing the names of such companies or associations, together with the date of their certificates, as have been rendered during this official year, (up to the 15th of Nov.) They will prove to be of more general interest than much other matter that is required by law to be published in the report of this department. I have also included in this list, the names of such incorporated companies, as have, under the law, changed their names during the same period. It will be observed that as many as SIXTY-FOUR new companies, for a wide variety of purposes (mostly manufacturing) have been organized within the State during the past year. About nine others have changed their names, or otherwise availed themselves of the provisions of the law regulating such associations. They will be found in appendix (C.)

**CITIES AND VILLAGES.**—In obedience to the law regulating the "organization of cities and incorporated villages," an abstract of such papers as have been transmitted to this office, in reference to the same, or the "consolidation of municipal corporations," will be found in appendix (D.) It will be seen that eleven newly organized villages have conformed with the terms of the law, and forwarded their papers to this office.

**JAIL REPORTS.**—There is, in the statutes, a law "for the regulation of county jails," by which it is made the express duty of the sheriffs of each county to make a "jail report," and transmit a copy of the same to the Secretary of State, whose duty it is to publish the same in his report. My predecessor in this department repeatedly called the attention of the General Assembly, to the continued negligence of the sheriffs to the law prescribing their duties in this respect. I am compelled to make the

same complaint. Eighteen sheriffs only, out of the eighty-eight, having complied with the terms of the law, during the last year. In view of the high value of the criminal statistics to be derived from these reports, I beg leave to urge upon the Legislature the propriety of attaching a severe penalty to this continued violation of law. If some action is not had upon this subject, at this session of the Legislature, I shall consider that this department is authorised to withhold the publication of such scanty returns hereafter. The eighteen reports alluded to, are on file in this office.

**BIRTHS, MARRIAGES, &c.**—The law providing “for the registration of births, marriages and deaths in Ohio,” passed at the last session, so far as it at present concerns this office, has been carefully complied with. The necessary blanks for the use of “assessors, clergymen, physicians, surgeons and mid-wives,” have been printed and distributed, but no returns could possibly be had until the ensuing year, when the tabular abstracts required from this office, will be prepared and published.

**SURVEYS.**—On the transfer of the Surveys of Congress Lands, from the office of the Surveyor General to this Department, pursuant to the act of Congress of June 12th, 1840, four volumes of the Records of the Surveys of lands East of the First Meridian and South of the Base Line, were missing. Diligent search was made for them by the Surveyor General, but they were never found. Much inconvenience resulted from their loss. It was quite impossible to furnish such copies as were required by law, for the use of individuals or of counties. The original field notes had been preserved but were in a state of rapid decay. To secure these valuable papers, in a permanent form, my predecessor wisely ordered a restoration of the lost volumes from the field notes. A competent person was employed and the work is nearly completed.

**IMPORTANT TABLES.**—I have thought it advisable to publish a table in the appendix, for general information and reference, containing a correct list of all the officers and employees of the State. It will prove of very great use, and will be a general answer to the many similar inquiries which are often addressed to this office. It will be found to contain a list of the State Officers, with the names of all the different employees in the various departments; the Judges of the Supreme Court and the Circuit Courts; the Bank Examiners, the Directors, Superintendents, Stewards, &c., of the Penitentiary and of the different Asylums; the Engineers on

the different divisions of the Public Works ; the Collectors of tolls and the Canal Inspectors. They may be found in appendix (E.) Immediately following these, is a list of the names, post-office address and counties, of the Senators and Representatives composing the present General Assembly.

## STATISTICS.

Article xv., Sec. 8, of the Constitution, provides that "there may be established in the Secretary of State's office, a Bureau of Statistics, under such regulations as may be prescribed by law. I desire to direct the attention of our General Assembly to the importance and necessity of the immediate establishment of such a Bureau of Statistics, in this department, as is wisely contemplated by the Constitution. The progress of the world, and especially the rapid development of these confederate States, has rendered a minute acquaintance with their resources and actual condition, more than ever necessary to every class of our people. The accurate statistics of a State, is her faithful history—the unimpeachable record of her strength and weakness, or her growth or retrogression. The great importance of correct information in reference to the condition and resources of a government, is now fully recognized by every civilized nation. It is, indeed, a marvel of the age, that individual members of this enlightened republic, should be slow to institute such a disclosure of their affairs, as has long ago marked all the leading monarchies of Europe. Ohio, no less than any other empire of intelligent people, should keep a ledger, showing at a single glance, the physical, moral and sanitary condition of the State. The General Assembly is not prepared for promoting the general welfare of the people, by salutary laws, except they are furnished with facts and figures, from which they may deduce sound rules of administration. The wise business man, every year, makes an inventory of his possessions ; equal wisdom in the State would make it shun many an error, and in an hundred ways promote the public good. It is eminently true, so little information does there exist of the resources within our borders, that we neither understand our duties or appreciate our advantages. The establishment of an efficient Bureau of Statistics, will be the means of collecting and disseminating statistical information, touching every interest of the State. By this means our abundant materials will be lucidly arranged and methodized, and we shall be furnished with complete data in reference

to our population, agriculture, commerce, manufactures, minerals, trade, finance, health, and all other kindred topics of inquiry.

Statistical inquiries were common among the Greeks and Romans ; but the honor of the better development of its principles, and the application of them to beneficent purposes, belongs to Prussia, where they assumed form, and passed into operation, about the middle of the last century. Since then, the science has made rapid progress throughout the continent. Even in despotic Russia there is a well established system of registration of births, marriages, &c.; and the little kingdom of Denmark, since the year 1835, has published no less than twenty-eight volumes of statistics.

Among the States of this confederacy, Massachusetts is in advance of every other, both in the extent and accuracy of its statistical investigations. There is, in the State Library, a large volume, entitled "The Industry of Massachusetts for 1855," which was prepared from official returns, made to the Secretary of the Commonwealth, under their statistical laws, which presents, as a map, the entire resources and industrial wealth of that enlightened people. Such a schedule of the condition of Ohio, would be of untold value to both citizen and statesman. A very minute investigation has been instituted in New York, though not so accurate, I believe, as in Massachusetts. Even a more minute investigation than either of them was begun in Louisiana, under the able supervision of Prof. DeBow, but has failed as yet for want of adequate legislation. The following abstract from the circular issued by Prof. DeBow, at the time, will indicate the wide extent of the subject matter for investigation, by a well organized Bureau of Statistics in Ohio :

I. Time of *settlement* of your town; number and condition of its first settlers; other facts relating to its settlement and history.

II. *Indian names* in your vicinity; what relics or monuments of them.

III *Biography*, anecdotes, of individuals in your vicinity distinguished for ingenuity, enterprise, or literature.

IV. *Topographical description* of your hills, rivers, ponds, &c.; vegetable growths, rocks, minerals, clays, chalk, flints, marble, coal, medicinal and poisonous substances, nature of surface, what quality of water, mineral springs, caves, &c.

V. *Agricultural description* of county, state of cultivation, changes taking place, lands occupied and unoccupied, character of soil, value of lands, new growths, profits of agriculture, state of roads, manures, fruits, rivers and orchards, &c.

VI. Instances of *longevity* and *fecundity*; observations on disease among you, &c.

VII. *Population*, number, character, increase, white or black, native or foreign, condition, employment, marriages, births, &c.

VIII. *Education and religion*; schools, colleges, libraries, expense of education, literate and illiterate, churches, how supported, oldest interments, vaults, &c.

IX. *Products in manufacture and arts*; kinds of, persons employed, capital, wages, profit, raw material used, machinery.

X. *Commercial statistics*, value of the imports and exports of the State, increase or decrease of.

XI. *General Statistics*, embracing banking, railroads, insurances, navigation, intercommunications, learned and scientific societies, crime and pauperism, charities, public and benevolent institutions, militia, newspapers, &c.

XII. Date, extent, consequences, and other circumstances of droughts, freshets, whirlwinds, storms, lightning, hurricanes, or any other remarkable physical events; meteorological phenomena, changes in climate, &c.

XIII. Literary productions from your neighborhood; literary associations; what important manuscripts, public or private records or journals, letters, rare old books, interesting in their relation to the history of the State.

XIV. A summary of all other matters of general interest.

Inquiries have repeatedly been addressed to this office, from distinguished professors, both at home and abroad, concerning the most ordinary statistics of our State, which, to our mortification, we have been unable to answer, simply because no previous legislation has provided, in any manner, for the gathering of such statistics. The intelligence of the age demands a different condition of things in Ohio. It is a matter which rises above party considerations; and, as it is for the common interests, demands a common support.

**EXPENSE.**—In the law of last winter, authorizing “the registration of births, marriages and deaths,” it is provided, that the assessors, while making their lists of taxable property, shall, in a list, separate and apart from that of taxable property, record “the births, marriages and deaths” in their respective townships. The expense of this additional labor is already provided for in that law. Now, it is easy, without any very considerable additional expense, to append certain other inquiries to the extra blanks, already in the hands of the assessors, and the more especially so, as it is required by law, that those blanks shall be furnished from this office. It will also require a special and competent clerk, whose duties will be confined strictly to the bureau, and who should receive his appointment simply from his eminent fitness for the position. His salary should not be less than one thousand dollars. Add to the above, two thousand dollars more, for additional printing, postage, paper, books, &c.,

and you have before you something near the entire expense of organizing a Bureau of Statistics in this department. Grant us the law organizing this bureau, this winter, and, even at the close of the present year, we will give you such a volume of statistics as will abundantly repay the expense incurred..

**GEOLOGICAL SURVEY OF THE STATE.**—As subsidiary to the above, I take occasion, here, to state the condition of the geological survey, formerly undertaken, and, also, to respectfully urge upon the General Assembly, the wisdom of the resumption of a work, which was compulsorily abandoned by the State, in a time of financial stress. A geological survey of the State was ordered in 1836, which contemplated an expenditure of \$48,000, in four annual instalments of \$12,000 each. A corps of able geologists was organized, and the work vigorously prosecuted for more than a year, when it suddenly terminated, in 1838, for want of a further appropriation. It appears that two annual reports were made, but, not anticipating the abandonment of the survey, they were incomplete in themselves, and of no very great scientific importance, as the more valuable material and deductions were retained for a final report. Much valuable material, thus collected, is now in the hands of the geologists who began the survey. Charles Whittlesey, of Cleveland, has recently published a general outline of the geology of the State, in a small, but ably written pamphlet, the fruit, in part, of the survey ordered by the State. This little work presents, in a very condensed form, the only complete outline we have of the geological formations of Ohio. It will be observed, at once, that private enterprise is altogether inadequate to the expense of so great a work. It is a work entirely dependent upon the munificence of the several States. To North Carolina belongs the honor of being the pioneer in this scientific enterprise. So early as 1825, she ordered a geological survey of her entire domain. In nearly all of the States of the union a geological survey has either been ordered, or is now in actual prosecution. In this respect, several of the North-western States, and especially Wisconsin, are far in advance of our own. So completely was the recent survey of the State of New York made by her geologists, at the instance of the Legislature, that their classification of rocks has become the standard for the United States.

If the object of such a work was only for the general advancement of science, it is an enterprise eminently worthy of the liberal patronage of a great State. But there are, also, other considerations, which invite the attention of the enlightened legislator. The wealth of Ohio is, as at

present developed, mainly agricultural. But the tide of emigration, now seeking landed homes, no longer pauses in our timbered State. It continues Westward, to occupy cheaper lands, and ready cleared farms. This column of emigration, which passes over us, is also enlarged by accretions from our own citizens. This fact would seem to indicate a comparative cessation of our hitherto rapid growth. Population is an element of wealth and of power. With us it is not yet redundant, and should be retained, and invited to increase the market for property and products. In no way can this be so successfully accomplished as by a full exhibit of the physical and mineral wealth of our State. By refusing to Science the means of unlocking the wonderful resources of Ohio, we are robbing ourselves of wealth, and virtually abstracting property from the grand duplicate. There are revelations to be made in our coal and iron bearing strata, which will invite capital, and retain population, to a degree far beyond any other resource in our domain.

The investment which the State made years ago, in our canals and turnpikes, has been returned through the various channels of taxation, both principal and a still compounding interest, by the rapid development of our territory, and the consequent increase of the assessors' schedule. So will renewed thrift follow upon the development of the new sources of wealth, which are imbedded in the hills of Ohio. A limited expenditure, and a re-organization of the corps of geologists, acting in concert with the Bureau of Statistics, in this department, will most readily consummate the desired object.

PRINTING AND BINDING.—In obedience to the law, regulating the "printing and binding," the Secretary, Auditor and Treasurer of State, having given the required notice, on opening the sealed proposals, awarded the State printing to Richard Nevins, of Columbus, for two years, from the 15th of November last, (1856.) And, also, the binding, for the same period, to N. W. Laffavor, of Columbus.

The above mentioned parties have deposited, in this office, the requisite security for the fulfilment of their respective contracts.

A list of the articles of stationery, furnished to the different departments and institutions entitled to the same, is on file in this office. The unusual size of this report precludes the publication, at present, of so long a list.

ANNUAL REPORT  
OF THE  
SECRETARY OF STATE.

---

SECRETARY OF STATE'S OFFICE,  
COLUMBUS, O., Nov. 20, 1857. }

*To His Excellency, SALMON P. CHASE, Governor of Ohio :*

I have the honor to submit the annual report of this department, with the accompanying documents, for the year 1857.

The miscellaneous character of the business in the Secretary's Office, and the wide range of its detail, are of such a nature as to preclude the possibility, in a report of this sort, of rendering a complete schedule of its various transactions. Such, however, as are either required by law, or are obviously essential, are herewith transmitted.

**ELECTION RETURNS.**—The want of uniformity in the character of the returns of elections made to this office, obviously requires a remedy. No one but those canvassing votes can well comprehend the inconvenience, and often doubt, which arises from the forms, or more frequently perhaps, from the want of form in the returns made. I would, therefore, respectfully suggest, that the General Assembly authorize this office to furnish the county clerks with such blank forms for all returns of elections made to this department, or the President of the Senate, as will in the future, secure entire uniformity in the returns made.

**TIMES OF HOLDING COURTS.**—The regular times of holding the District Courts and the Courts of Common Pleas, with such alterations as have been made from the publication of last year, are presented in appendix (A.) I have thought it best to prefix to this statement, as a desirable accompaniment, the list of the Judges, corrected from the latest returns, in the several Judicial Districts.

**BIRTHS, MARRIAGES AND DEATHS.**—The law providing "for the registration of births, marriages and deaths in Ohio," may be regarded as fairly initiated. Returns of the same have been received from 80 counties. They have been condensed in this office, agreeable to the requirements of the law, and have been sent

to the printer. A portion of these returns are by no means complete. But this, of course, was to be expected in the initiation of a law requiring so large a number of agents in its execution, and such minuteness of detail. The counties from which no returns have been received, are Crawford, Delaware, Fairfield, Fulton, Hancock, Montgomery, Paulding and Putnam.

**INCORPORATED COMPANIES.**—I have continued in this report the publication of such "Incorporated Companies" as are required to file the certificate of their association in this office. I have also included in this list, the names of such incorporated companies, as have under the law, changed their names during the past year. It appears that fifty-six new companies have been organized, as against sixty-four last year; while others have changed their name, agreeable to the provisions of the law regulating such associations. It is proper to mention in this connection, that the western terminus of "the Clinton line extension Railroad Company," has, by a decree of court, been changed. They will be found in appendix (B.)

**INCORPORATED CITIES AND VILLAGES.**—In obedience to the law regulating the "organization of cities and incorporated villages," an abstract of such papers as have been transmitted to this office, in reference to the same, or the "consolidation of municipal corporations," will be found in appendix (C.) It will be observed that six new villages have been incorporated, while two others have enlarged their limits. One, (Mansfield,) has been advanced to a "city of the second class." It will be noticed that the "record of the incorporation" of the "village of Bellaire City" was annulled by decree of court.

**JAIL REPORTS.**—For reasons assigned in the report of last year, I have omitted the publication of the jail reports, only twenty-three counties having made returns during the current year. I see no reason why the Legislature should longer tolerate this continued negligence of the Sheriffs. Let the statute touching this matter be either erased or enforced.

**DISTRIBUTION OF LAWS, &c.**—Since the completion of the distribution of the regular laws, journals and documents for the year, arrangements have been made, by the authority of the joint resolution of last winter, for the pro rata distribution among the counties, of the "old" legislative documents, journals, laws, reports, and session laws of the United States. The number to be distributed is large, but it is believed that the work will be well nigh completed by the middle of January. As nearly as could be obtained, several complete sets of these various documents, have been boxed and held in reserve for the use of the State. Under the new law regulating the number of public documents printed, it is believed that there will be no such accumulation in the future. I would here observe that the books of this office will show that there has been no detention in the distribution of laws and journals on the part of this department.

**FUEL**—It is proper to state that the cost of fuel during the past year was largely increased from the fact that on a contract made by my predecessor, a large amount of coal was received, when, late in the season it was ascertained not to be suitable for the purpose designed. We were accordingly forced into the market for our supply when the rates were unusually high. The contract for coal for the present year, (30,000 bushels,) was awarded in equal parts, after much consideration, growing out of difficulties between the conflicting coal interests of the State, to E. Ball and C. S. Roberts, of Zanesville, they being the lowest bidders. A contract for 400 cords of wood, at \$2 25 per cord, was distributed among several parties at the same figure. It is the amount supposed to be sufficient by those having the furnace in charge. But I think, however, from the experience of last winter, that it will be found to require annually, nearly double that amount.

**BUSINESS TRANSACTIONS OF THE OFFICE.**—The law of last winter, (April 16, 1857,) making it the duty of the State Officers "to keep, or cause to be kept in their respective offices, accurate and distinct accounts of the several transactions in their respective departments," has been complied with. Our books show a journalized account of our several transactions; of bids received and awarded; of contracts made and bonds filed; of bills bought and paid; of stationery distributed; of disbursement of the Secretary's contingent fund, &c. For an itemized statement of the disbursements of the contingent fund; of the expense of distribution of laws, journals and documents; of stationery and fuel bought, see Auditor's "detailed statement." Such other matters as pertain to these not elsewhere published, will be found in appendix (D.) An itemized account of the distribution of the stationery among all the departments and institutions, and both branches of the General Assembly, is upon record in this office, and subject to inspection.

I have the honor to be respectfully,  
Your obedient servant,

J. H. BAKER,  
Secretary of State.
